

Leaf spectroscopy

FluoWat + 2 QEPro spectroradiometers

Upward optical fiber connected to spectroradiometer

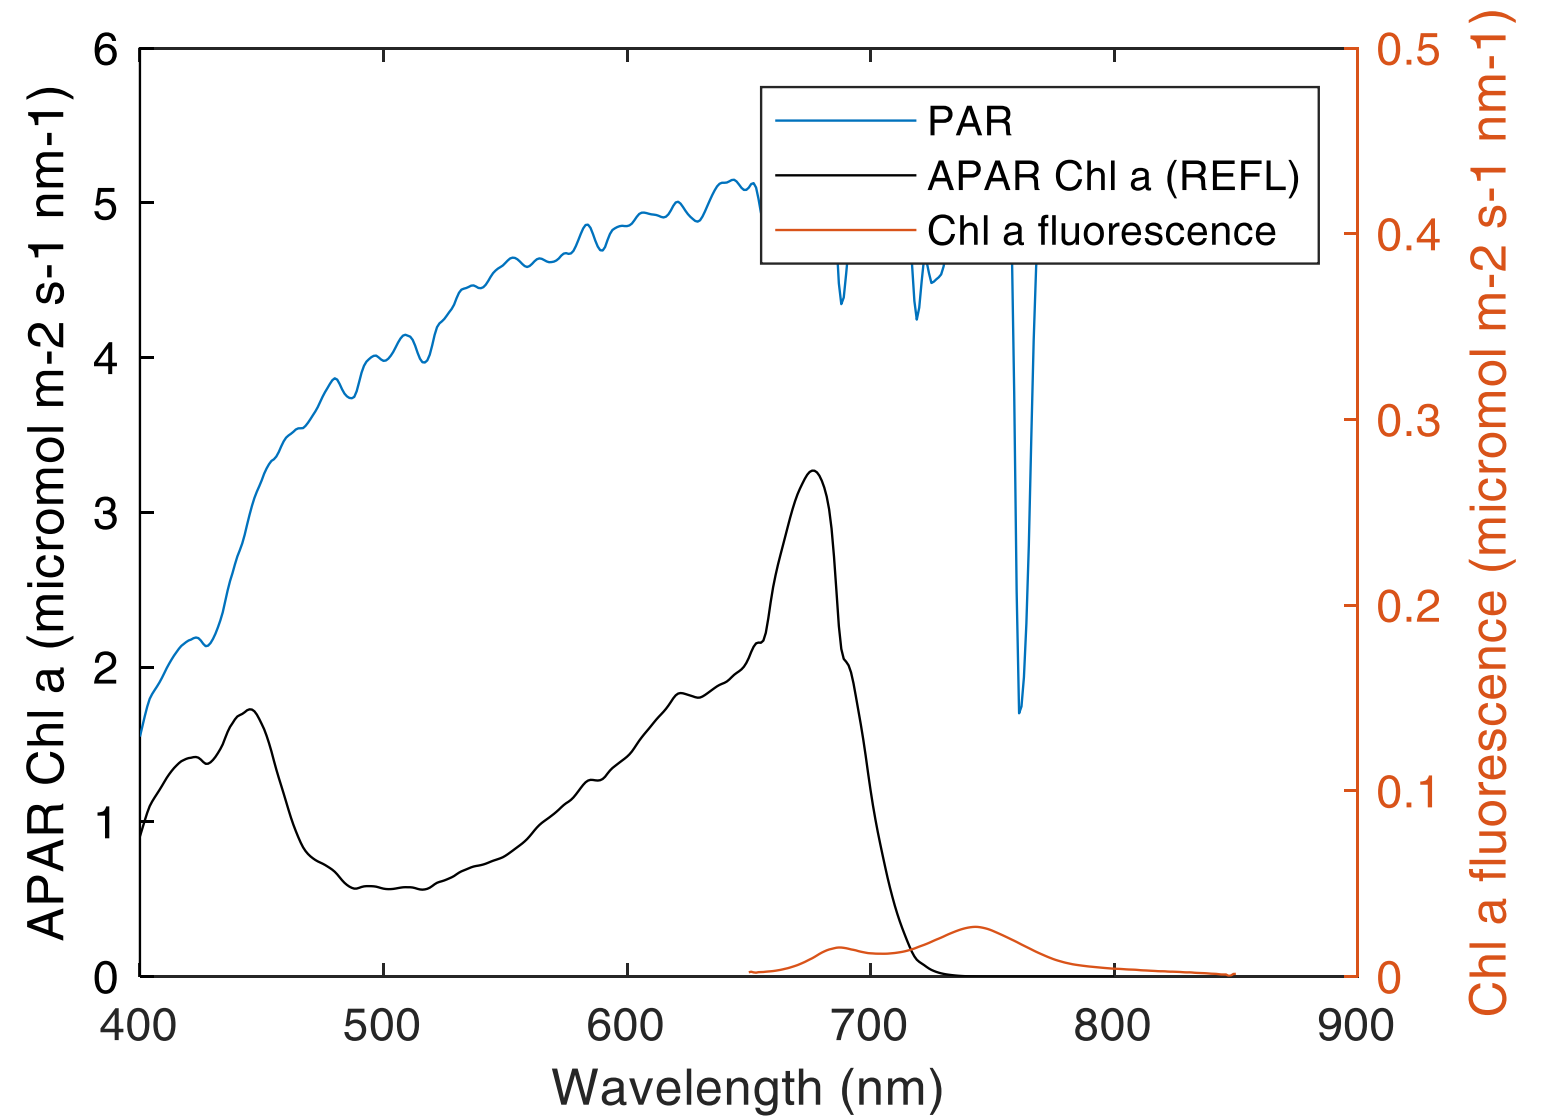

LED

Filters

Downward optical fiber connected to spectroradiometer

White reference

Fluorescence quantum efficiency (FQE) obtained from leaf spectroscopy

$$FQE = \frac{SIF_{\lambda=670-780 \text{ nm}} [\mu\text{mol m}^{-2} \text{s}^{-1}]}{APAR \text{ Chl } a_{\lambda=400-800 \text{ nm}} [\mu\text{mol m}^{-2} \text{s}^{-1}]}$$
